What are you looking for?

DSA Foundation

Our courses for Data Structure & Algorithms are taught in JAVA and C++ together. These courses are the steps to master your coding skills. Start with the basics of programming followed by advanced topics like Graphs , DP & competitive programming. The final piece of jigsaw is our list of question often asked in technical interviews.

Level Up

Advance DS Algo taught in Java & C++. This course has quick revision of basic DS Algo in Java & C++ and competitive programming too. Additional classes will also be provided on OOP's & Pointers.

Interview Preparation

We cover a total of 600 most often asked questions in technical interviews. We also provide notes for OS, OOP's and Pointers, System Design. At the end of this course, we also conduct extra classes for projects which prepares a student to tackle any end in an interview.

Web Dev

The only course you need to become a full-stack developer be it making real world websites , or web apps. This course introduces you to industry level development using React & Node. This is your one stop shop to ace Web development & open source projects.
